

Senior Frontend Engineer (React)

[Apply Now](#)

Company: Dotlinkers

Location: Poland

Category: computer-and-mathematical

Our client is a young startup with a vision to become the commerce and financial technology backbone of the construction industry in the US. Founded by serial entrepreneurs with exits to Fortune 500 companies they build a world-class team with a mission to digitize and democratize construction material purchasing. This is a unique opportunity to join the ground level an industry-transforming company.

We're looking for a Frontend Engineer with experience building web and mobile interfaces and interactive web/mobile components. This is the job for someone that cares about delivering best-in-class products and experiences – not features and is excited about working on the modern stack of technologies (GraphQL, React, React Native).

About you:

You are excited about startups and new products

You enjoy building systems from the ground up

You have a passion for user experience and design and an understanding of front-end architecture

You realize that products are built iteratively and specs evolve with customer feedback

You care about elegant code design: well-architected code is easier to understand, refactor, evolve, and inherit

You care about products that have a massive economic impact and have an interest in FinTech

What we look for:

3+ years of experience with HTML, CSS, and JavaScript

1+ years of work experience with a JavaScript frontend framework, preferably React

Knowledge of (and a passion for) current trends and best practices in front-end architecture, including performance, accessibility, security, and usability

Eye for design, product details, and polish

BS (or higher) in Computer Science, related technical field, or equivalent practical experience.

Experience with server-side development is a plus

Experience with GraphQL is a plus

Benefits:

Flexible time off

Equity awards (after working for at least 3 months)

Gym reimbursement

Annual personal development fund

Swanky new work laptop

Work headphones reimbursement

Regular offsites at fun locations
