

Senior Java Backend Developer

[Apply Now](#)

Company: Divante

Location: Wrocław

Category: computer-and-mathematical

Want to shape the world of eCommerce with us?

Divante creates **eCommerce solutions** that make the business of our clients thrive.

For our newly established Java department we are looking for **Senior Backend Developer Java**

. This is a strictly technical role – you will not be expected to manage a team (unless you feel like doing it) – we need you to be a hands-on developer delivering actual technology solutions and crafting top-quality code. Depending on your seniority you will get a chance to support the technology leadership in designing and introducing the best programming practices.

Are you ready to take on this adventure?

Employment type: B2B or CoE

Salary:

140 – 170 PLN/h net

16 600 - 23 500 PLN gross

Your daily tasks as a Senior Backend Developer.

Designing communication flows,

Designing API inbound and outbound for synchronous communication,

Defining and developing treatment executed by APIs,

Clarifying mapping between events and **microservices (inbound or outbound),**

Working in an agile environment.

You will be a perfect match if you:

Have 8+ years (total) of hands-on work in software development in an engineering position with direct exposure to code – it is a strictly technical role, and you need to be up to date with modern tech.

Have hands-on programming experience with **Java, Hibernate, Spring Boot** including DB and service layers.

At least have some exposure to any flavour of JS will be a big advantage.

Have experience working on Cloud-based, multi-layered applications in a microservice architecture (database, backend, services, front-end) – either **Azure, AWS or GCP will do** .

Have knowledge of modern software engineering processes and tools (**GIT, Jira/Azure DevOps, Agile** development practices, **DevOps unit testing etc**).

Good understanding of **Containerization, Cloud infrastructure, CI/CD pipelines etc**.

Worked in Scrum (we do not want you to be a Scrum Master, but we need you to understand what is going on).

Have ability to work in English on daily basis both internally and with the customers.

Have some experience with the following would be an advantage: Kafka Apache, MongoDB, relational database (MS SQL, PostgreSQ
