

Senior Java Engineer - Big Data

[Apply Now](#)

Company: Relativity

Location: Wrocław

Category: computer-and-mathematical

Location: Wrocław

Department: Engineering

Work Status: Full-time

Location Type: Remote

Overview

Are you looking for a hybrid or remote work opportunity? Are you interested in a workplace that allows for flexibility in your day? Are you ready for a workplace that provides benefits that suit your needs? Join our team as we innovate the future of data platform architecture, enabling massive scaling and data processing for ML and Gen AI projects. You'll be at the forefront of processing vast unstructured data, building high-throughput APIs, and supporting distributed compute frameworks for seamless model deployment. Ready to dive into the heart of cutting-edge tech?

Your role in action

Build our next-generation data platform tooling and services to support the ingestion and processing of billions of documents at scale.

Improve and extend our Spark based distributed data processing pipeline.

Improve and extend our Rust based distributed query engine used to request large amounts of document data.

Create tools to automate and optimize processes across disciplines

Actively participate in the on-call schedule to investigate and fix production issues related to our data processing pipeline or query engine.

Participate in code reviews for projects written by your team

Focus on quality through comprehensive unit and integration testing

Your Skills

4+ years of software development experience in writing performant, commercial-grade systems and applications

Experience with monitoring and troubleshooting production environments

Proficiency in programming languages used in high volume data processing and applications like Java or Scala and Python

Experience building data pipelines with distributed compute frameworks like Hadoop, Spark, or Dask

Knowledge of Linux/Unix systems, Docker/Kubernetes and CI/CD including scripting in Python or other scripting languages to automate build and deployment processes

Knowledge of professional software engineering practices & software development life cycle, including coding standards, code reviews, source control management, build processes, testing, and operations

Leverages best practices and past experiences to mentor and improve the productivity of the team

We'd particularly love it if you have

Deep experience building and debugging distributed data pipelines

Experience with columnar databases and storage formats like Delta Lake and Parquet

Experience deploying and managing services on Kubernetes

Experience building with Rust

If you don't meet 100% of the above qualifications, you should still seriously consider applying.
