

Senior Java Engineer

[Apply Now](#)

Company: avenga

Location: Poland

Category: computer-and-mathematical

What you bring along:

5+ years of commercial experience with Java;

Competent in Spring and Hibernate Frameworks;

Proficient in RDBMS (PostgreSQL, MySQL);

Experience with NoSQL databases (MongoDB, Redis, etc);

Good understanding of Web services;

Knowledge of Kafka;

Familiar with robust testing and debugging tools;

English – Upper-intermediate or higher.

This is your mission:

Write clean, maintainable and test-covered code and work with our product team to create great products for our customers;

Contribute to a future-ready, high-quality, and performance code base;

Be involved in the entire product lifecycle, including the design, development, deployment, and maintenance of new and existing features;

Be fully integrated into the tech team including sprint planning, daily stand-ups, etc;

Share your technical solutions and product ideas with the team;

Take part in code review and refactoring processes.

Your benefits:

Our employees get performance and salary reviews;

Everyone at Avenga is subject to professional growth via our mentorship program;

The company provides extended training and certification opportunities;

We stay up to date with the industry by embarking on tech talks, webinars, conferences, and hackathons;

Our team uses the Cafeteria Worksmile platform;

Avenga cares for its employees by providing Health insurance – LuxMed;

Our employees have Leadenhall insurance;

We offer an attractive Referral bonus program;

The company fosters a sense of professional belonging and an environment of togetherness: we achieve things together and we celebrate our milestones together.
