

Senior Medical Field Advisor

[Apply Now](#)

Company: BeiGene

Location: Poland

Category: other-general

BeiGene continues to grow at a rapid pace with challenging and exciting opportunities for experienced professionals. When considering candidates, we look for scientific and business professionals who are highly motivated, collaborative, and most importantly, share our passionate interest in fighting cancer.

Company Overview

General Description:

As a member of the organization, the Senior Medical Field Advisor will support regional and local strategies and establish compliant relationships with opinion leaders, research collaborators and key organizations in support of the BeiGene pipeline development across all therapeutic areas. This position will require pre-launch and post-launch Medical Affairs support for hematology and oncology pipeline development, focusing on malignant hematology. The incumbent will work closely with internal colleagues in medical affairs, clinical development, program leadership, clinical operations, legal, compliance, new product planning, safety/pharmacovigilance, molecular diagnostics, translational research and other cross- functional business partners. The Senior Medical Field Advisor will support BeiGene pre-clinical and clinical pipeline development by coordinating external collaborations, research endeavors with health care providers and external academicians. The individual will play a key role in the establishment of BeiGene as a valued collaborator and best-in-class biopharmaceutical company. This position reports to the Country Medical Director, who in turn reports to the SRE Medical Affairs Director.

Essential Functions of the job:

Provide education to the medical community on BeiGene products and disease areas of focus.

Work closely with internal stakeholders to develop and execute a medical plan designed to meet shared objectives.

Facilitate responses to unsolicited requests for medical information, often in direct collaboration with BeiGene Medical Information Services personnel.

Develop tactics for communicating complex scientific information to the healthcare community.

Provide impactful feedback/information to internal stakeholders on emerging clinical and scientific trends from external interactions to help shape company research, and to ensure the safe and appropriate use of BeiGene products.

Build specific excellence and integrity within the healthcare community. Develop contacts with key clinicians, university teaching hospitals, , patient's organization and other medical/ scientific groups.

Develop speakers through one-on-one clinical training on approved clinical slide sets.

Act as a clinical resource with professional and advocacy organizations with the objective of developing relationships and identifying potential business opportunities.

Assist in the development and execution of clinically relevant regional medical meetings (e.g. advisory boards, consultancy and investigator meetings), as requested

Identification and verification of investigators and sites for company-sponsored clinical trials

Serve as the primary territory liaison for the submission and review of Investigator-Research proposals, facilitating the process from concept submission through publication and uncover scientific data that may have the potential for publication and/or abstract presentation.

Supervisory Responsibilities:

None

Computer Skills: MS Office skills (Outlook, Word, Excel, PowerPoint, Veeva).

Other Qualifications: Preferred existing experience as MSL or similar role within other biotech/pharmaceutical companies; Clinical research experience is preferred; Knowledge of applicable treatment, compliance, and regulatory guidelines; High level of English and Polish communication (written and verbal), interpersonal, organizational, and cross functional collaboration skills.

Travel: Work related travel required
