Senior Mendix Low-code Developer

Job offer from Other department for senior-level applicants from Poland, Remote EU and Remote outside EU.

At Netguru, we're all about helping innovators and entrepreneurs shape the world through beautiful software. That is our mission.

With employees from 15+ different countries, we've worked with over 800 clients from more than 50 countries. To name some of them: OLX Motors Europe, UBS, Careem.

But we're not just another tech company. As a Certified B Corporation®, we're dedicated to creating an inclusive environment for all, and we take our commitment to sustainability seriously.

How freelancing works at Netguru?

As a Netguru freelancer, you can choose what works well for you. You decide when, where, and how you work on projects and tasks.

We match you with work that fits your skills. Plus, you have access to various opportunities across different industries and companies. That means you will not only gain more experience, but also develop various skills.

But there's more. Netguru freelancers can benefit from full-time collaboration and really be a part of the team.

So, are you ready to make an impact? Join Netguru, and let's build beautiful software together.

Required skills Mendix, Java, CSS, fluent English (German is a plus).

You get: 100% remote work, a team of experts, dev-friendly processes.

Interested in joining us? Great! Before you apply, here are a few things to keep in mind:

You'll be responsible for:

Development of mobile and web applications using Mendix low-code development platform.

Building interfaces using pre-built templates and components.

Describing data structures and program logic using Mendix visual development environment.

Working closely with clients to gather and define requirements.

First, check if you have:

Several years of project experience and relevant technical knowledge.

Good ability to diagnose application problems and decide what can be done with low-code instead of traditional coding.

Proficiency with CSS

Intuitive sense of how to turn an idea into an actual working application using the Mendix platform.

Customer-focused and collaborative thinking Team skills and strong communication skills.

What's in it for you? Becoming a Netguru Freelancer means:

Flexibility: 100% remote work.

Professionality: dev-friendly processes, like Continuous Integration and Code Review, work in line with Agile methodology.

Diversity: projects from various industries like fintech, healthcare, insurance, or education.

Growth: work with a team of experts and continuous development of your hard and soft skills.

Knowledge: knowledge sharing sessions, internal knowledge base.

Curious to learn more about working as a Netguru freelancer? All the information you need is

here: Netguru Talent Marketplace.

Here's what you can expect from the recruitment process:

First, you'll meet with one of our recruiters to get to know each other better.

Next, you may be asked to complete a coding challenge and/or participate in a pair programming session with one of our tech experts.

If everything goes well, you'll have the opportunity to meet with the client during a final online interview.

In the last step, we will guide you through some paperwork and document verification, and make sure you're all set to join us smoothly.

Don't hesitate and apply right away.

Netguru Talent Marketplace - How does it all work?

At Netguru, we're committed to creating an inclusive environment for everyone. If you require any disability-related adaptations during the recruitment process, please let us know. We're here to help!
