

Senior/Principal Data Platform Engineer (Defense Platform)

[Apply Now](#)

Company: Sigma Software

Location: Poland

Category: computer-and-mathematical

Overview

Required skills

Python / strong English / strong

We're offering a seasoned Data Engineer an excellent chance to work closely with clients and enhance the current solution.

If you're prepared to exhibit substantial dedication in making technical decisions through state-of-the-art data collection and solving complex problems, this opportunity awaits you.

If this resonates with you, join our team! We're looking forward to having you on board!

Customer

Our client is HUMAN, a Brooklyn-based company founded in 2012. Starting from humble beginnings, the company developed the Human Defense Platform, the cornerstone of all our products, which protects enterprises from advanced bot attacks, fraud, and account misuse. Today, we authenticate more than 20 trillion interactions every week for large companies and leading online platforms, verifying their authenticity.

Requirements

Requirements

Proficiency in crafting solution designs and comprehensive architectures, balancing diverse constraints

Adept problem-solving abilities, thriving in situations where details are scarce, and relishing the opportunity to influence solution direction

Fluency in Python, with hands-on coding experience

Strong command of databases, including relational DB (OLTP and OLAP), and adeptness in DDL/DML/SQL queries

Expertise in managing cloud-based modern OLAP database solutions like Snowflake for data warehousing.

Experience in ETL pipelines, with proficiency in Airflow

Deep understanding of developing, scaling, and overseeing large-scale data pipelines in the cloud (AWS, S3) from inception

Excellent communication and presentation skills

At least an Upper-Intermediate level of English

Would be a plus

Experience with Java, Golang

Responsibilities

Responsibilities

Operating within a high-capacity production setting

Leading the conceptualization and execution of intricate solutions within the MediaGuard platform

Collaborating with diverse teams encompassing Product Management, Software, DevOps, and MLOps to align and organize multiple requisites and initiatives

Functioning as an independent contributor
