

Senior Python Engineer, Customer Value Track (Solutions area)

[Apply Now](#)

Company: PandaDoc

Location: Poland

Category: computer-and-mathematical

Currently, PandaDoc is seeking a **Senior Python Engineer** to join our **Customer Value track**, specifically in the **Solution area**.

Are you adaptable, driven, and friendly? Do you thrive in a fast-paced work environment where collaboration is a must? If the answer is yes, you're a Panda, and we want you to join our team.

Revenue Solutions Area designs and **delivers complete end-to-end solutions** in our

Product so can we unlock new markets and **bring new happy customers to PandaDoc!**

Our main goal is to bring new MRR by expanding product-market fit from the Sales team to **the Revenue team** use cases.

In this role, you will:

Build new solutions from scratch;

Take end-to-end technical ownership of features and improvements;

Build and maintain application architecture;

Actively collaborate with product managers and scrum masters.

Our stack:

Service-oriented architecture but be prepared to deal with legacy code as well as monolithic services based on the Django framework;

Two main stacks Python and Java:

Python services are mostly written using AsyncIO frameworks and libraries, but we also have Django-based services with Celery workers under the hood; Java services based on Spring Boot with custom extensions, Java 11, and Gradle as a build tool;

Amazon Web Services;

The main cross-service communication transports are NATS, Kafka, and RabbitMQ;

Prometheus stack for monitoring and alerting;

Jaeger for distributed tracing.

About you:

At least 5+ years of development experience with Python;

Experience with the Django framework;

Experience with any relational databases (SQL queries, migrations, optimization);

Experience with message queues (e.g., RabbitMQ, NATS, Kafka);

Care about quality and you know what it means to ship high-quality code;

Put yourself in the shoes of your users and be a steward of crafting great experiences;

Strong communicator. Explaining complex technical concepts to product managers, designers, customer support, and other engineers is no problem for you;

Hands-on experience in developing a microservice architecture;

Experience in writing units and end-to-end tests is a plus;

Communicate effectively in English, both spoken and written;

We have tasks in Java from time to time (about 10%), so readiness to write on Java is appreciated.

Company Overview:

PandaDoc empowers more than 50,000 growing organizations to thrive by taking the work out of document workflow. PandaDoc provides an all-in-one document workflow automation platform that helps fast-scaling teams accelerate the ability to create, manage, and sign

digital documents including proposals, quotes, contracts, and more.
