

Senior QA Automation Engineer

[Apply Now](#)

Company: Intel

Location: Poland

Category: computer-and-mathematical

Job Description

Drives software quality from concept to delivery via specific KPIs and quality targets. Works with product development teams throughout development phases to ensure software quality requirements and goals are established and met to determine release readiness and risks. Analyzes product quality data and drives improvements through defect prediction models, requirements traceability, and SWLC optimizations. Improves customer experience with critical issue management, throughput time, root cause analysis, and software practices assessments. May work directly with customers to understand requirements upfront, pain points during development and delivery, and drive execution improvements through Intel's development life cycle. May create tools and automation to support quality evaluation and data analytics (SWLC, Defects, uQRC vectors), perform outofbox testing for software products to recreate customer experiences and pain points, and assess the state of the art to employ new methods to improve quality and product release efficiency.

Qualifications

Minimum qualifications are required to be initially considered for this position. Preferred qualifications are in addition to the minimum requirements and are considered a plus factor in identifying top candidates.

Minimum Qualifications:

At least 3 years of test automation experience

High proficiency in test automation on different test levels.

Deep understanding of good quality practices and processes within Agile methodologies.

High level of ownership and responsibility.

Excellent problem solving skills and innovative mindset.

Knowledge of Unix/Linux commands.

Networking knowledge, including an understanding of L2/L3 networks, subnets, LAN/WAN, Wi-Fi, Port Forwarding, DNS resolving, SSH tunneling, and router operations.

Experience with embedded systems and/or networking devices.

Requirements listed would be obtained through a combination of industry relevant job experience, internship experiences and or schoolwork/classes/research.

Inside this Business Group

Enable amazing computing experiences with Intel Software continues to shape the way people think about computing – across CPU, GPU, and FPGA architectures. Get your hands on new technology and collaborate with some of the smartest people in the business. Our developers and software engineers work in all software layers, across multiple operating systems and platforms to enable cutting-edge solutions. Ready to solve some of the most complex software challenges? Explore an impactful and innovative career in Software.

Posting Statement

All qualified applicants will receive consideration for employment without regard to race, color, religion, religious creed, sex, national origin, ancestry, age, physical or mental disability, medical condition, genetic information, military and veteran status, marital status, pregnancy, gender, gender expression, gender identity, sexual orientation, or any other characteristic

protected by local law, regulation, or ordinance.
