

## Senior React Engineer

[Apply Now](#)

Company: Dotlinkers

Location: Poland

Category: architecture-and-engineering

Our client is an industrial analytics and software company purposed to digitize the physical world. Their tools and software transform traditional sources of engineering knowledge into accessible, usable data that supports advanced analytics and daily field operations.

The offer is for ambitious Engineers who value having an impact on the final product, are not afraid to make decisions about tools and technologies, and have a can-do attitude. If you are looking for a place where you can grow together with the company – this option is definitely for you.

### **Your tasks:**

Development of the SAAS application

Expanding user features

Enhancing design

Hardening connection with backend

### **Our requirements:**

Experience in Web development

Experience in React and TypeScript

Knowledge of SVG

Experience in GIT

Familiar with good software practices (tests, CI/CD)

Ability to design and cover full workflow: design (looks), design (UX), development

The capability of interacting with various APIs: like REST, GraphQL, gRPC

At least B2 English level

**Nice to have:**

Linux/Unix fluid (terminal workflow)

Feeling comfortable with using Docker or other containerization tools

Familiarity with graph databases

Mobile experience (react native or other)

NextUI

Understanding of networking, CDNs and knowledge of how to optimize serving websites

**What's in it for you?**

mandatory influence on the final shape of the product and the choice of tools and technologies

paid days off

flexible working hours

fully remote job (no hidden office visits, even "from time to time")

Cafeteria platform (Multisport, health insurance etc.)
