

Senior SAP Hybris Engineer (Java)

[Apply Now](#)

Company: GPC Global Technology Center

Location: Kraków

Category: computer-and-mathematical

We are growing rapidly and therefore expanding our IT team. This team will empower the Dutch IT team. The Krakow team will consist of Backend, Frontend, and Test engineers. As a Backend developer, you will be responsible for the code of SAP Customer Cloud, which is written in Java. We have already a team that builds our MVP, you and your team will go from MVP to the moon. We are looking for a self-starter with a few years of experience on the job, and some experience as a lead.

Ideally, the Dutch team and the Krakow team meet a few times a year, varying between our locations.

Responsibilities

- taking care of further development within architectural decisions and check that these are followed by all

- making use of and contributing to the Git branching model, code reviews, coding standards, unit tests, and documentation

- checking and improving agreements on architecture both in documentation as in code reviews,

- implementing performance based principles in your code,

- writing component and unit tests,

- cooperating with the full team internally and externally

joining and contributing to demo's, refinements, and other Scrum rituals.

Requirements

3+ years of experience in a similar position

experienced in SAP (Hybris, CC) and JAVA,

keen eye on requests and work towards improvement

good communicator, who cooperates well within a team and knows English on a professional level

Nice to have

Location

Krakow/Hybrid
