

Senior Web Architect, Front End

[Apply Now](#)

Company: Pegasystems

Location: Kraków

Category: computer-and-mathematical

Meet Our Team:

The Digital team at Pegasystems creates, maintains and continuously improves the websites that help people learn, sell and buy Pega applications. The 8+ digital properties we work on span internal and external audiences across offices in North America, Europe, and the Asia Pacific region.

Picture Yourself at Pega:

We are looking for an experienced React developer to join our growing global team. You will work with a diverse global team of developers, designers, and content creators to help shape React and web digital experiences.

What You'll Do at Pega:

Lead Pega UI initiatives and provide solutions to complex problems

Manage and coordinate work amongst a team of developers to ensure work is done in a timely manner

Build and code enterprise level React applications and UI design system

Resolve complex issues reported on existing applications

Partner with other IT teams to seamlessly integrate React applications and UI solutions with Pega's enterprise systems

Refine complex requirements into bite sized technical specs

Communicate effectively with project managers, product owners, and development team members to facilitate understanding of deliverables, estimates, and prioritization

Help with the technical evolution of the Pega Digital IT React and Design System framework

Implement development best practices

Who You Are:

A motivated, and accomplished web developer with a record of accomplishment of building state-of-the-art, scalable, extensible, and feature rich React applications, with the following qualities:

Strong technical problem-solving skills and the ability to work independently on projects

Passionate about learning and applying new JavaScript and web technology

Committed to collaboration and teamwork in all facets of development

Excellent critical reasoning, oral and written communication skills

Strong interpersonal skills, with the ability to work independently and as part of a cross-functional team

Have experimented with Generative AI Applications

What You've Accomplished:

7+ of React experience

7+ experience working with Design Systems

10+ years HTML/CSS/Javascript development experience with a CMS

5+ years experience with GIT with branching strategies like GitFlow

5+ years experience with agile software development and Scrum

Experience building UI Experiences in Drupal, helpful

BS or equivalent

Pega Offers You:

Gartner Analyst acclaimed technology leadership across our categories of products

Continuous learning and development opportunities

An innovative, inclusive, agile, flexible, and fun work environment

Competitive global benefits program inclusive of pay and bonus incentive, employee equity in the company
