

# Poland Jobs Expertini®

**Software Consulting Engineer (Python).**

[Apply Now](#)

Company: Cisco

Location: Kraków

Category: architecture-and-engineering

**Do you want to help create the future? The opportunity is right here in front of you.**

**We achieve a vision together with our customers . We have the insight and expertise to make it happen. Like helping Dubai's Expo2020 event delight 25 million visitors with the help of Cisco's secure intent-based network.**

**We deliver projects at ambitious scale and speed . With a multinational team of 60 specialists from 12 nations, we are leading an ecosystem of vendors to take on engineering and design, system integration, testing, validation, security and operations for a large mobile network in EMEA. The result will be deploying cell sites in minutes, not weeks.**

**We capture opportunities with data and digital platforms. To accelerate the value customers get from IT every single day, we're continuously innovating in the insights we make available.**

## **What You'll Do**

**You'll get a lot of hands-on experience, the ability to earn industry-leading certifications, and access to customer experience labs with over \$1.7B in assets to stay up-to-date on dynamic new technologies. You'll also get continuous training and development in both technical and leadership/customer skills areas.**

**Love people? Excellent. You'll be the "face" to our customers delivering on our promises. The role is part creative problem solver, part status quo challenger. You're also**

**a customer advocate working with development engineers and sharing what's new and top of mind back to your customers.**

**You will be the technical consultant for complex deployments. You're the one assisting the customer to help them identify and adopt methodologies for design, implementation, optimization, configuration, software lifecycle management, network health, security and automation.**

**Most meaningfully, you're a problem solver who focuses on synthesizing information and knowledge to achieve a solution to complex technical issues, and by doing that, making a true positive impact. Are you ready to join the most groundbreaking tech company ever? #ChallengeAccepted**

**Minimum Qualifications:**

**Bachelor's degree in Computer Science, Mathematics or relevant technical experience**

**Strong English oral communication, written and listening skills.**

**Experience writing code in Python.**

**Network programmability basic understanding of NETCONF/YANG, REST, JSON, Network telemetry.**

**Consulting experience facing customers directly with good soft skills.**

**Design, Implementation and optimisation project experience with network automation and DevOps awareness.**

**Basic Understanding of internet routing protocols and concepts TCP/IP, BGP, MPLS, ISIS and/or OSPF.**

**Experience working in AGILE methodology and knowledge of tools like Rally, Jira.**

**CI/CD knowledge (Jenkins, Go pipelines, Robot, Git, Artifactory)**

**Working and maintaining Linux systems.**

**Experience working with deployment and orchestration technologies (such as Ansible, Docker, Kubernetes, OpenStack, Jenkins, robot framework).**

**Experience with Network Function Virtualisation (NFV)**

**Experience handling critical customer issues and working towards resolution.**

**Self-motivated and creative; solid leadership ability and interest; energized by working collaboratively and with an innovation mindset.**
