

Software Development Engineer in Test - Remote

[Apply Now](#)

Company: Akamai

Location: Poland

Category: computer-and-mathematical

Would you like to impact the digital experiences of millions of users?

Do you enjoy solving large-scale distributed systems problems?

Join our Edge & Applications Networking QA team!

Our team tests all Products and Technologies across the Edge & Application Networking Engineering group. We develop automation infrastructure for product testing and collaborate with the rest of the Engineering teams to qualify features. We are knowledgeable about all Delivery products and focus on System integration testing replicating real-world scenarios.

Ensure world-class Delivery performance

You will be tasked with solving critical software automation and verification problems in a distributed systems environment. Working with developers and other QA teams, you will become an expert in system-wide automation infrastructure. You will ensure the exceptional performance of the products used to deliver the world's most significant OTT events.

As a Software Development Engineer in Test, you will be responsible for:

Contributing to system test plans to ensure highly effective test coverage & automation

Creating and deploying automated tests to replicate real-world scenarios

Improving testing methodologies and procedures to enhance test automation efficiency

Reviewing product & system design requirements to verify accuracy of test plans and test cases

Finding and reporting bugs

Do what you love

To be successful in this role you will:

Have relevant experience and a Bachelor's degree in Computer Science or related technical field

Have demonstrated experience in developing test automation in Java, JavaScript, SQL

Have knowledge of automation frameworks such as RestAssured, Selenium or Cypress

Have experience working in Agile methodology and knowledge of tools such as Git, Jira, Jenkins

Be passionate about solving large-scale distributed systems problems and enjoy collaborating and solving problems with others.

Have exposure or interest in working with internet technologies such as TCP/IP, HTTP, DNS, etc.

Work in a way that works for you

FlexBase, Akamai's Global Flexible Working Program, is based on the principles that are helping us create the best workplace in the world. When our colleagues said that flexible working was important to them, we listened. We also know flexible working is important to many of the incredible people considering joining Akamai. FlexBase, gives 95% of employees the choice to work from their home, their office, or both (in the country advertised). This permanent workplace flexibility program is consistent and fair globally, to help us find incredible talent, virtually anywhere. We are happy to discuss working options for this role and encourage you to speak with your recruiter in more detail when you apply.

what makes Akamai a great place to work

Connect with us on social and see what life at Akamai is like!
