Software Development Engineer in Test

Warsaw, Masovian, Poland, 03

Lionbridge Games is seeking a Software Development Engineer in Test to join our Team cooperating with one of the biggest tech companies in the world.

The ideal candidate will have a solid knowledge and professional experience in games test automation and test framework development, great interpersonal skills and Unreal Engine proficiency.

At the heart of our innovation lies a commitment to you and a strong work-life balance that ensures you remain at your best, both professionally and personally. We're deeply invested in your career growth and development, offering a plethora of opportunities to learn, lead, and leap forward.

What You Will Do

Develop tools/solutions for repetitive tasks to improve efficiency and productivity

Integrate new solutions with existing tools and pipelines

Write clean, maintainable, and well-documented code in C#/C++

Debugging C# and C++code in the context of Unreal Engine Automation solutions to find the root cause and fix the issues

Develop, maintain, and improve the automation solutions/tools/frameworks

Integrate tools/Automation solutions to CI Systems and be able to debug them

Contribute to the overall technical vision of the team

Instrument product code to improve its testability.

Mentor TAE, Sr TAE at Lionbridge Games.

Remain current on software testing best practices and industry trends.

Monitor software to detect and root cause code errors.

Work in partnership with Client's internal QA and Dev teams.

To Be Successful You Will Have

3+ years of Tools and Automation development experience in desktop/console gaming environments or in a similar role

Experience with Unreal Engine game development (3+ years) and CI/Build systems

Expert code debugging skills in C++ and C#

Experience with SQL/NoSQL databases

Strong sense of ownership and responsibility

Ability to move forward on your own in a fast-moving environment

Excellent communication and collaboration skills

Adept with version control concepts. Ideally experienced using Perforce

Basic understanding of at least 1 Command Line Interface (Cmd, Powershell, etc)

Fluent English.

Experience in algorithms and data structures. Competence within Unit Testing.

Experience with bug tracking tools.

Attention to detail.

Highly developed technical communication

Experience with QA processes, test scope requirements and testing method.

Not Required But Would Be An Asset.

Master's degree in computer science or equivalent experience.

Professional coding experience in other programming language.

Major consoles devkits experience.

Experience in game development lifecycle.

In Return You Can Expect

Contract of employment with employee benefits package including private medical care, sport card, day off on your birthday and holiday allowance.

Flexible working hours aligned with Client's requirements with ability to work from home.

Exposure to various technology stacks, and opportunity to cooperate with one of the biggest tech companies in the world.

Flexible working hours aligned with Client's requirements with ability to work from home.

Access to Lionbridge's Employee Wellness Platform.

Access to both internal and external training platforms.

Career guidance with learning and development opportunities along the way, backed by Lionbridge's internal mobility and referral bonus programs.

About Lionbridge Games
