Software Engineering Intern - Poland

[Apply Now](#)

Company: Samsara

Location: Poland

Category: computer-and-mathematical

Who we are

Samsara (NYSE: IOT) is the pioneer of the Connected Operations™ Cloud, which is a platform that enables organizations that depend on physical operations to harness Internet of Things (IoT) data to develop actionable insights and improve their operations. At Samsara, we are helping improve the safety, efficiency and sustainability of the physical operations that power our global economy. Representing more than 40% of global GDP, these industries are the infrastructure of our planet, including agriculture, construction, field services, transportation, and manufacturing — and we are excited to help digitally transform their operations at scale.

Working at Samsara means you'll help define the future of physical operations and be on a team that's shaping an exciting array of product solutions, including Video-Based Safety, Vehicle Telematics, Apps and Driver Workflows, Equipment Monitoring, and Site Visibility. As part of a recently public company, you'll have the autonomy and support to make an impact as we build for the long term.

Recent awards we've won include:

Glassdoor's Best Places to Work 2024

Best Places to Work by Built In 2024

Great Place To Work Certified™ 2023

Fast Company's Best Workplaces for Innovators 2023

Financial Times The Americas' Fastest Growing Companies 2023

We see a profound opportunity for data to improve the safety, efficiency, and sustainability of

operations, and hope you consider joining us on this exciting journey.

to learn more about Samsara's cultural philosophy.

About the role:

We are looking for talented engineers to join our full-stack backend and frontend teams!

These Summer 2024 roles will be based in Poland.

Full-stack, Frontend engineers develop user interfaces that present the data collected from thousands of devices in intuitive ways. You will work directly with the design and product teams to identify solutions and iterate quickly based on feedback. The features you build will provide actionable insights for our customers' operations, and may involve anything from design systems to performance engineering.

Full-stack, Backend engineers design and develop features across a broad surface area with tangible impact on active and future customers. You will tackle engineering challenges ranging from architecting data structures for mass data collection to presenting data analytics in intuitive and performant ways on web and mobile.

We use Golang for our backend, Typescript and React for our web client, GraphQL to fetch data from our backend, and React Native for our mobile app. Direct experience with these technologies is not required.

You should apply if:

You want to impact the industries that run our world: Your efforts will result in real-world impact—helping to keep the lights on, get food into grocery stores, reduce emissions, and most importantly, ensure workers return home safely.

You are the architect of your own career: If you put in the work, this role won't be your last at Samsara. We set up our employees for success and have built a culture that encourages rapid career development, countless opportunities to experiment and master your craft in a hyper growth environment.

You're energized by our opportunity: The vision we have to digitize large sectors of the global economy requires your full focus and best efforts to bring forth creative, ambitious ideas for our customers.

You want to be with the best: At Samsara, we win together, celebrate together and support each other. You will be surrounded by a high-caliber team that will encourage you to do

your best.

to learn about what we value at Samsara.

An ideal candidate:

Will complete a Bachelor's or Master's degree in Computer Science or a related technical field between Fall/Winter 2024 - Summer 2025

Has built or worked on production applications

Enjoys understanding our users and what would make their day-to-day processes easier to manage

Loves shipping features that are immediately used by our customers

Seeks to iterate on new products based on customer feedback

Is available for 12 weeks in Poland starting in May/June

Will champion, role model, and embed Samsara's cultural principles (Focus on Customer Success, Build for the Long Term, Adopt a Growth Mindset, Be Inclusive, Win as a Team) as we scale globally and across new offices

At Samsara, we welcome everyone regardless of their background. All qualified applicants will receive consideration for employment without regard to race, color, religion, national origin, sex, gender, gender identity, sexual orientation, protected veteran status, disability, age, and other characteristics protected by law. We depend on the unique approaches of our team members to help us solve complex problems. We are committed to increasing diversity across our team and ensuring that Samsara is a place where people from all backgrounds can make an impact.

Benefits

Full time employees receive a competitive total compensation package along with employee-led remote and flexible working, health benefits, Samsara for Good charity fund, and much, much more. Take a look at our site to learn more.

Accommodations

Samsara is an inclusive work environment, and we are committed to ensuring equal opportunity in employment for qualified persons with disabilities. Please email or if you require any reasonable accommodations throughout the recruiting process.

Flexible Working

At Samsara, we embrace a flexible working model that caters to the diverse needs of our teams. Our offices are open for those who prefer to work in-person and we also support remote work where it aligns with our operational requirements. For certain positions, being close to one of our offices or within a specific geographic area is important to facilitate collaboration, access to resources, or alignment with our service regions. In these cases, the job description will clearly indicate any working location requirements. Our goal is to ensure that all members of our team can contribute effectively, whether they are working on-site, in a hybrid model, or fully remotely. All offers of employment are contingent upon an individual's ability to secure and maintain the legal right to work at the company and in the specified work location, if applicable.
