

Software .NET Engineer (Backend)

[Apply Now](#)

Company: Dotlinkers

Location: Poland

Category: computer-and-mathematical

Imagine being part of the revolution, part of what is beyond retail, media and social. Now it is your chance! We are looking for a **Software .NET Engineer** to join the most exciting project in Krakow. Their mission is to bring customer experience to another level.

Personalization of the content is key to being number one in video commerce, e-commerce and mobile commerce. Most of their business is in the US right now (that is why they have over 500 tech people on board there). They have offices in China, Japan, the UK, Italy, Germany and now in Krakow, Poland.

Key responsibilities:

Develop .NET services and GraphQL APIs within video and streaming domains.

Collaborate with cross-disciplinary teams including product designers, product managers, testers, release engineers and TV/web clients' developers to design, develop, test, and ship innovative features for our streaming services and TV/web applications.

Contribute to proof-of-concept, feasibility analysis and experiments to explore future state of video commerce.

Analyze and define requirements to prepare their specifications and estimations in the process of agile software development.

Conduct code reviews, write unit tests, code refactoring.

Contribute to CI/CD implementation for the developed solutions (including establishing sustainable and automated code quality, build strategies and test automation practices).

Troubleshoot applications problems and drive toward resolution in the process communicating delays, risks, issues to right internal and external parties.

Required skills and experience:

3+ years of professional software development expertise in .NET in Agile methodology.

Strong understanding of the software development life cycle (SDLC) and software architectures (web applications, micro-services and cloud-native applications are desirable).

Programming knowledge of C# with frameworks .NET (6.0+) and .NET Core (2.0+).

Practical experience with logging and monitoring tools like Elastic, Kibana, Grafana and Dynatrace.

Knowledge of programming in C# with frameworks .NET (6.0+) and .NET Core (2.0+).

Working experience in Continuous Integration and Continuous Deployment activities especially with AzureDevOps and GIT code repositories.

Ideally some experience with containers (Docker) and containerized platforms (Kubernetes, AKS).

Working experience with Jira / Confluence etc.

Practical experience with building UIs with JavaScript frameworks and libraries (ideally ReactNative, Svelte) is a plus.

Understanding of public cloud (Azure) is desirable in the areas of network topology, storage, computation, and security, including: Files, blobs and DBs. Authentication and authorization Functional-based / asynchronous programming / Serverless architecture

Good knowledge of English in speaking and writing.

Nice to have: knowledge of GraphQL APIs (Apollo, Apollo Federation, HC) and REST APIs.

We offer:

Attractive salary

Multicafeteria membership

Private healthcare

Flexible working hours

Hybrid work model combining office & remote work

Company performance-related bonus

Life Insurance

Recruitment process: two interviews
