

Strong Junior/Middle DevOps Engineer (Telecom domain)

[Apply Now](#)

Company: Sigma Software

Location: Poland

Category: computer-and-mathematical

Overview

Required skills

Networking / strong Linux / strong Kubernetes / strong CI/CD tools / strong English / strong

Are you a DevOps Engineer interested in building scalable, secure infrastructure? Willing for autonomous work as well as a part of the team, taking area of responsibility and delivering results? If you are excited about working directly with the customer, if you enjoy delivering high-quality solutions to meet their business needs and exceed expectations, we will be glad to have you as part of our team! This is an excellent opportunity for you to work as part of a skilled team in a multi-national environment in the world-leading telecommunication enterprise.

Customer

Our customer is one of the leading network service providers and top-ranking telecom infrastructure companies globally with nearly 100,000 employees. It delivers products and services needed for mobile and fixed-line communication, radio networks and transmission networks. More than 40% of phone calls are made through their systems and more than 2 billion people worldwide use their network.

Project

Our team helps the customer (telecom provider) to migrate applications to the cloud infrastructure, implement CI/CD, security and administration best practices using modern DevOps tools. You will join the team bringing the organization's DevOps practices to modern standards to reduce costs and boost efficiency.
