

Supplier Performance Engineer

[Apply Now](#)

Company: Westinghouse Electric Company LLC.

Location: Kraków

Category: architecture-and-engineering

Supplier Performance Engineer is responsible for managing and overseeing relationships with suppliers to ensure the delivery of high-quality metal work components and contribute to solutions to the complex aspects of a project or process.

This role involves working closely with suppliers to establish and maintain strong relationships, monitor performance, ensure delivery certainty and identify areas for improvement. You will be part of AP1000 program in Europe with a specific focus on Bulgaria and Poland.

Specific responsibilities include:

Supplier Evaluation and Development Conducting overall supplier assessments, evaluating suppliers capabilities for highly complex technical products, processes and systems, and ensuring that a supplier manufacturing facility has all the machines, spare parts, material, components, and supplies require to operate. These goods must comply with Westinghouse's quality and standards requirements.

Leading supplier development and qualification activities for new products and cost reduction efforts with a subject matter expert approach. This includes identification of project risks and mitigating actions, managing project schedules, approval of supplier process documents, process capability analyses, measurement system analyses, input to design for manufacturability, etc.

Supplier Oversight Evaluating procurement risk, soliciting stakeholder input, and leveraging tools and resources to develop and manage Oversight Plans and estimates:

Defining Witness and Hold points during the manufacturing

Executing or delegating oversight of key supplier operations and activities, documenting results and taking appropriate action

Supporting the project management team to interface with Supplier Quality Organization for performing Quality surveillance

Supplier Management Managing flow down of Quality and Technical requirements to suppliers, , NQA-1, ISO, Design Specifications, Approved Processes, etc.

Driving the supplier performance, including supplier performance scorecard/dashboard. Ensures maximum value is received for the Purchase Order that WEC places to its suppliers, including full compliance to the quality and technical specifications.

Responsibility to develop Performance Improvement Plans for poor or negative trends in performance and managing those plans to completion. This includes owning the Supplier Corrective Action Request (SCAR) process: performing cause analyses and verifying completion of preventative and corrective actions

Leading and escalating significant “quality events”, coordinating activities, issuing timely communications, identifying stakeholders, etc. to ensure prompt identification of impacted products, disposition, & corrective action. This requires engaging his extensive technical experience and capabilities for providing Manufacturing technical expertise to the supplier when needed

Coordinating supplier documentation reviews by appropriate Westinghouse functions, including the Supplier Non-Conformance Reports

Providing regular progress report to the Business Unit Stakeholders (Project Manager, Program Director, etc.) with an effective communication

Supporting Commercial Operations and Legal for Quality/technical bases of supplier claims, as required

Who are you :

Bachelor Degree or higher in Mechanical/Material Engineering

Fluent in Polish and English

Working knowledge of Manufacturing and Quality Plans, PFMEAs, etc.

Experience leading multiple, concurrent cross functional projects

Experience with nuclear products and standards (ASME) desired

Personal, industrial and nuclear safety as a key area of concern

Having some knowledges about Design-To-Manufacturing and Manufacturing Readiness Level process

Experience performing process capability analysis and qualification

Willing to travel to the supplier Workshop based in Europe. The expectation is up to 25% of your time on business trip to allow to be on the workshops

Benefits:

Stable employment in SSC in Kraków

Outstanding and supportive atmosphere of collaboration in the team and in Westinghouse group

Attractive remuneration with bonuses

Hybrid model of work, flexible working time

Benefit package with Multisport card

Life insurance

Private Medical Care

Charity initiatives

Parking space for employees

Employee referral program
