

## Test Automation Engineer – automotive industry

[Apply Now](#)

Company: Groupe SII

Location: Kraków

Category: computer-and-mathematical

The Embedded Competency Center is an organizational unit that brings together over 550 specialists in the field of embedded systems. These are the internal forces of Sii for the implementation of various projects and services with expertise in embedded systems technologies (C, C++, Python).

As a part of CC Embedded, we deliver embedded systems solutions mainly used in the automotive, semiconductor, and Internet of Things industries. We also have clients e.g. from the medical, cartography, or railway industries.

Become our Test Engineer and get a chance to work on a project for our client from the automotive industry! Join us and work while learning and developing yourself on projects that impact our communities and society.

### Your role

Developing, documenting, and executing software systems tests according to E&S standards

Defining test procedures and test cases

Developing automatic test environments and automatic tests

Executing tests, creating test reports, and reporting bugs

Participating actively in software systems test-related reviews

### Your skills

5 years of experience as a Tester

Basic knowledge of C/C++ programming languages

Experience with Vector CANoe & CAPL

Understanding of automotive communication buses such as CAN, Automotive Ethernet, and FlexRay

Familiarity with Unix/Linux systems

ISTQB certification

Strong English communication skills at the B2/C1 level

Job no.240404-58AV4
