VP Financial Engineering - Lead DevOps Engineer

Miejsce pracy: Kraków

Technologies we use

Expected

Python

FastAPI

Apache Airflow

S3

Kubernetes

Jenkins

Docker

About the project

Global Finance aspires to be the best finance function in the financial services industry, delivering powerful insights to our customers, within the bank and externally. We work as a seamless team to support HSBC's businesses to deliver our strategy.This role is focused on leading the design and implementation of new, future-proof modelling solutions.

Your responsibilities

Design, build and implement Global Treasury containerised solutions and CI/CD automations.

Support building and implementation of Global Treasury Python-based modelling solutions.

Deliver a coding environment that is easy to use, is robust and can be fully re-used.

Provide automated solutions for fast and agile model build and deployment.

Work closely with business stakeholders, Quantitative Analysts and IT to create synergies across different functions and departments and contribute to the end-to-end design and planning.

Implement software strategically, following best practice to ensure that solutions address the evolving business and regulatory requirements.

Work closely with the Head of Financial Engineering to ensure smooth change management and maintenance of the system in compliance with HSBC Group standards.

Work closely with the Quantitative Analytics teams to build software solutions that are practical, workable and comply with accounting, regulatory or other requirements.

Our requirements

Vast experience in designing and building containerised solutions and CI/CD pipelines – also from scratch – for end2end automations on cloud-based platforms (GCP, Docker), preferably utilising Jenkins and Github integration.

Experience in backend development of large scale applications and systems in Python, especially for cloud environments, preferably including development of libraries and designing/extending of APIs is considered a plus.

5+ years of relatable experience.

Expert knowledge of at least three of: Python, FastAPI, Apache Airflow, S3, Kubernetes, Jenkins, Docker.

Experience in writing and reviewing technical documentation and leading test-driven development.

Knowledge of finance, particularly quantitative finance, experience of Risk or Analytics is nice to have.
